

Signaling Solutions for Converging Networks

Adax Expands to China

Shanghai Office Supports Growing Demand for Signaling Infrastructure in Asia Pacific

PT/Wireless & Networks Comm China 2005, Hall 9, Booth 9B04, Beijing, China

October 21, 2005 – Adax Inc., the industry leader in high performance communications and signaling infrastructure, today announces the establishment of a new office in Shanghai, the first Adax office in China, to support growing demand for Adax products in the Asia Pacific region. The Adax Shanghai Representative Office provides support services for Adax's growing customer base in the Asia Pacific region.

Supporting Asia Pacific customers from Shanghai improves customer service response time through enhanced communication. Rapid time-to-market is a major factor in China's burgeoning telecommunications industry as Chinese carriers are beginning to invest heavily in 3G and NGN networks. Adax's increased support efficiency will allow customers to deploy their signaling application, node, or system, as quickly as possible, irrespective of the underlying network interfaces or architecture.

The Adax Shanghai Representative Office marks Adax's fourth worldwide office. Adax headquarters, founded in 1982, are located in Berkeley, California, USA. Adax established Adax Europe Ltd. in Reading, England, UK, in 1990 to respond to the growing demands of the EMEA marketplace, and acquired the Radisys Signaling Gateway division in 2003. The new Shanghai office will continue to work with Adax's distributor in China, Tekview Technologies Co, Ltd. to support local customers.

About Adax

Specializing in signaling infrastructure since 1982, Adax provides high performance SS7, ATM, IP and Interworking products to the world's leading telecommunications companies. Adax communications controllers, protocol software, signaling blades, and signaling gateways offer Network Equipment Providers unparalleled flexibility and efficiency in meeting the challenges of convergence and 3G networks. Typical application areas for Adax products include Signaling Gateways, Media Gateways, Softswitches, GPRS and 3G nodes, Base Station Control, and Billing Mediation. Adax is headquartered in Berkeley, California, with additional offices in the United States, Europe, and Asia
